📍 Sofia, Bulgaria

EXPERIENCE

Freelance Developer

Groshev & Partners

📅 02/2023 - 06/2023   📍 Sofia, Bulgaria

🔗 https://www.legalbg.net/

Took part in leading the communication with the client, planned the technologies that best met the client's requirements, and determined the necessary steps to meet the client's criteria.

- Next.js, React JS, Type Script, JSON
- Additional Libraries: TailwindCSS, Daisy UI, Google Blogger API

Front End Developer

TECHSTORM LTD

📅 06/2022 - 12/2022   📍 Sofia, Bulgaria

Participating in the creation of an MVP for a website as a front-end developer and a mobile application, extended existing functionality and implemented new features by completing assigned tasks.

- Tech stack: Next JS, React JS, React Native, Type Script, MongoDB, JSON.
- Additional Libraries: Auth0, Ant Design, Axios, Moment JS, TailwindCSS, React Router.

PROJECTS

Forum: Tasty Recipe Talk

As part of a team, I was involved in creating the food recipe forum, creating the database connection, the GitHub repository. Building functionality and style of the project.

- React JS, Firebase
- Chakra UI

Portfolio App Hosted on Vercel

🔗 https://portfolio-radoslav-marinov.vercel.app/

The portfolio is created with Next.js and a library called Nextra(opens in a new tab) that gives flexible generation of content based on MDX files.

- Next.js, Type Script
- Nextra, MDX

Twitter Like SPA

🔗 https://radoslav-marinovv.github.io/like-comment/

React with TypeScript application created by Vite. Display mock data on main page by fetching it from custom hook. Validate it before creating new post (check for the min – max length of the post). Communication between current User Object and Post Object and update likes and posts.

- React JS, Type Script, JSON
